

Weekly Challenge!

Can I count to the highest number that I can everyday this week?

Grown-ups:

Could you support your child to count to the highest number they can and then help them to count further eg if they can count up to 2, can you support them to count to 3, or if they can count to 17, support them to count further. We are not looking for counting objects just the counting names. You can post your child's counting on their child's tapestry account.

Learning to recite numbers in order is a skill that children need to learn.
