Can you help me to look for and talk about circles?

Grown-ups:

Can you help your child look for circles.

Everywhere you go can you help them to spot a circle. You could talk about the properties of a circle; that it is a round, two-dimensional shape.

If your child is interested you could introduce other words related to a circle such as 'circumference' (which is the distance around the circle), or the 'diameter' (which is the distance across the circle). You could post your child's interest in circles on their tapestry account.
