Can you help me to look for and talk about rectangles?

Grown-ups:

Can you help your child look for rectangles.

Everywhere you go can you help them to spot a rectangle. You could talk about the properties of a rectangle; that it has 4 sides, 2 of which are the same length and are shorter than the other 2, which are longer but the same length as each other. If your child is interested you could introduce other words related to a rectangle such as 'right angle' (which is a 90' angle) or parallel. You could post your child's interest in rectangles on their tapestry account.
